

Mitigating Climate Change through Tree Planting

South Africa is faced with serious challenges of heat wave that raised temperature in the country. This is as a result of climate change that is facing not only the country but also the world at large.

As part of climate change mitigation strategy, the Ephraim Mogale Local Municipality is engaged in the program of tree planting and cleaning of the environment. This program also encourages recycling of used material as part of broader local economic development.

This events will take place as follows:

Venue : Moganyaka (Ward 9)

Date : 20 September 2017

Time : 08h00
